List about showcase event

Country	Date of showcase event	Number of participants			
P4 – London, UK	17.05.2016	1	Mark	Lane	Director / Teacher
		2	Gavin	Adams	Teacher
		3	James	Butcher	Teacher
		4	Annette	Brener	Teacher
		5	Jose	Garcia Ruiz	Teacher
		6	Armin	Faghihi	Teacher asst
		7	Kate	Holloway	Teacher

General comments (positive and negative feedback, hints, etc.)

The event at LSI Central London was hosted and led by Mark Lane who took the lead in asking questions and taking interest in the EUSTORE project. According to Mark, all his team of teachers currently use OERs and very familiar with Teaching English as a Foreign Language (TEFL) resources. Their main resource is – onestopenglish.com They were surprised that other resources could also be used for TEFL. Found the session

- Very useful for planning lessons
- Huge potential to extend the content of the learning scenarios and add to EUSTORE repository
- Well suited to enhance learning processes, self- learning phases and group work
- Positive feedback from teachers about the form of the learning scenario
 - Easy to adapt other documents, contents and tasks featured in EUSTORE e.g. BBC bitesize and other TEFL resources on EUSTORE
 - Time specifications are great to structure the lessons and target specific groups of students
 - The links to the OER are very useful and give hints for more content providing pages
 - Willing to look at the new platform when ready

General comments (positive and negative feedback, hints, etc.)

EUSTORE UK took advantage of the invitation to OER meeting in Leicester which was hosted at The Learning and Work Institute. It focused on the ways how OE could be expanded in to schools, colleges, adult education, and HE. Participants were interested in the concept of EUSTORE and as experts in their own sectors they were interested to see if their work could be combined within the EUSTORE concept. Many who looked at the EUSTORE repository felt that it was

- Very useful for planning lessons in schools
- Huge potential to extend the content of the learning scenarios and add to EUSTORE repository using their own resources
- Well suited to enhance learning processes, self-learning phases and group work
- Positive feedback from teachers about the form of the learning scenario
 - Easy to adapt other documents, contents and tasks featured in EUSTORE e.g. wikimedia
 - Time specifications are great to structure the lessons and targets specific groups of students and adult learners
 - The links to the OER are very useful and give hints for more content providing pages
 - Willing to look at the new platform when ready

There was some concern whether another repository would be useful considering the presence in UK of Open Learn from Open University and JISC repository JORUM. However, as JORUM might be archived after September 2016 there might be a possibility to collaborate with the likes of Wikimedia.
